Office Action Summary

Art Unit: 2834

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 8 and 1-6 rejected under 35 U.S.C. 102(a) as being clearly anticipated by Nagai.

Note Nagai fig. 13-A clearly teaches the exact structure claimed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-13 and 15-22 rejected under 35 U.S.C. 103(a) as being unpatentable over Nagai.

Nagai (fig. 13-A) teaches the claimed structure except for some specific dimensions and coatings on the edge of the opening and the cover attached to close the opening. However, providing brazing and/or solder to form a hermetic seal is well known per se, and using these conventional sealing means for the opening cover of Nagai would have been obvious to one of ordinary skill in the art.
